

FABIÁN BRENES ORTEGA

Manufacturing & Industrial Maintenance Technician | Industrial Electronics

Higuito, El Guarco, Cartago, Costa Rica · +506 6007-5688 · fabianbrenes71@gmail.com · linkedin.com/in/fabianbrenes

PROFESSIONAL PROFILE

Técnico Medio en Electrónica Industrial (Industrial Electronics Technician) with 6 years of experience in electronic and medical device manufacturing at multinational companies. Specialized in SMT line equipment: pick and place, reflow ovens, fixture-based electrical testers and vision systems. Experience in preventive and corrective maintenance of electrical, pneumatic and vacuum systems, with measurable results in downtime reduction and yield improvement. Experience working under ISO 13485, in cleanroom conditions and regulated medical environments. SAP experience for spare parts management. English B2 (studied at Centro Cultural Costarricense Norteamericano) and technical training abroad. Currently pursuing a degree in Electromechanical Engineering.

PROFESSIONAL EXPERIENCE

Manufacturing Technician — Qorvo Inc. | Mar 2022 – Dec 2025

Zona Franca Metropolitana, Heredia · Semiconductor manufacturing. Departure due to Qorvo's Costa Rica plant closure and relocation to Asia.

- Preventive and corrective maintenance of SMT line equipment: pick and place, reflow ovens, fixture-based electrical testers and vision systems.
- Diagnosis and repair of failures in electrical, pneumatic, vacuum and compressed air systems.
- Monitoring and optimization of electrical test equipment performance through calibrations and technical adjustments.
- Spare parts management and requisition through SAP.
- Participation in continuous improvement and process optimization projects.
- Result: 15% reduction in production equipment downtime.
- Result: improved electrical test yield through fixture calibration and adjustment, reducing mechanical and test-related rejects.

Technical Operator — Coloplast | Aug 2021 – Jan 2022

Medical device manufacturing.

- Operation and technical support of industrial machinery for medical device manufacturing, in a cleanroom environment.
- Diagnosis, repair and preventive maintenance of electrical and pneumatic equipment under medical-sector quality and safety standards, including ISO 13485.
- Selected for technical training in Hungary as part of a technology transfer process for medical manufacturing equipment.

Lab Technician — Infotree Global Solutions (assigned to Intel) | May 2020 – Aug 2021

Intel technical area, Heredia · Semiconductor manufacturing.

- Technical support and operation of laboratory equipment on a semiconductor manufacturing line.
- Failure diagnosis and equipment maintenance under Intel quality standards.
- Rotating-shift work within a multi-level technical team.

Technical Internship — Paradise Ingredients | Oct 2019 – Nov 2019

Electricity and automation area.

- Technical internship in industrial electricity and automation.

AUTOMATION & DATA ANALYSIS

Self-developed automation, monitoring and data analysis tools, AI-assisted:

- 24/7 continuous-operation monitoring and data-logging system, with alerts, connection-failure detection and automatic recovery.
- Android application for profitability calculation and tracking, with local database and user interface.
- Statistical analysis of operational data and result validation using independent test sets.

EDUCATION

- Electromechanical Engineering — Universidad Fidélitas · In progress (35%)
- Técnico Medio en Electrónica Industrial (Industrial Electronics Technical Diploma) — COVAO · 2017 – 2019

TECHNICAL SKILLS

- SMT lines: pick and place · reflow ovens · fixture-based electrical testers · vision systems
- Maintenance: preventive · corrective · failure diagnosis · calibration
- Systems: electrical · pneumatic · vacuum · compressed air
- Software: SAP (spare parts & requisitions) · Microsoft Office
- Automation: data analysis · AI-assisted tool development
- Process: continuous improvement · yield optimization · downtime reduction
- Quality & regulated environment: ISO 13485 · cleanroom · regulated medical manufacturing
- Other: high-voltage and current work · customer service · ability to train others · driver's license

LANGUAGES

Spanish: native · English: B2 (upper-intermediate), studied at Centro Cultural Costarricense Norteamericano, with work experience and technical training in an international environment.
